Will do: it's been removed from the ftp server. I'll put it back Oct 1. .

The October quarterly release is tentatively scheduled to hit the streets the 3rd week of October.

I posted the file yesterday to the FTP server--it's available now.

GOVERNMENT EXHIBIT 1931

Awesome. Thanks.

Charles: you need to own any "press release" part of the contract.

file://\\craftsman\us-cd-9 in the \msie\unsup-ed folder is where I put the zip.

There will be no entry in the index for this file--they'll have to stumble accross it to know it is there.

ftp://ftp.microsoft.com/developr/msdn/unsup-ed is where I put it on the Internet--with 37 other (old) files in this directory I'd say it's pretty burried.

MSS 0057326
CONFIDENTIAL

Here you go:

<<File: rmi.zip>>

(this is the version off \\ianel2\public\junc - that is the one that passed the JDKs correct?)

Yup - Charles said he would chat with you - but it looks like he did not (and he is off on vacation right now). If we miss our 7/29 deadline we will go with Plan B: prop to the web in mid/late Aug and put it on the Sep MSDN CD. Thanks.

From our last conversation I was waiting to hear from you for the files. Yes--we can post to the web at any time. Thanks,

James

We need to get the RMI bits to the MSDN folks.

James: I presume Charles and you did not chat? Worst case can we just prop to the web in mid/late Aug and make the CD for 9/3?

Reminder: if these are going to be in the Sept interim I need them by 7/29. Otherwise I need them by 9/3 to make it in October.

Thanks,

James
