Topic: RE: internet explorer licenses

CONFIDENTIAL

1-The Microsoft Internet Exlporer Licensing Agreement states that you must
distribute Microsoft Internet Explorer V. 2.0 as the only browser for Win95
users. If you plan on distributing to Win3.1 or Macintosh users another
browser may be distributed, however the beta versions of MSIE are available
for Win 3.1 and Mac users to download off our website.

2-Yes

Subject: internet explorer licenses

We are very interested in distributing the MIE to our Win95 clients, and I have the license agreements here in the office. Two questions:

1 -will these agreements limit the other web browers we recommend to our other Winx.x clients, and
2 - is this product one that we can share with the local school districts' and their teachers (some 1000 individuals, about 25% of who probably have Win95).

If we can share this with teachers (en mass) can we hold a specialized workshop to introduce them to its use, and obtain additional promotional materials from Microsoft to make available at this event.

Thanks for your support

Cate Townsend
