Microsoft Internet Explorer 3.0

Features

HTML Standards

View advanced web layouts, with 1/20th the download time. Internet Explorer 3.0 supports the latest HTML standards: HTML 3.2 and Cascading Style Sheets, and HTML Layout.

Active Content

Internet Explorer 3.0 features ActiveX technology, so web pages can combine interactive ActiveX Controls, Java applets, and more to create truly interactive, outstanding content.

Software Security

Microsoft's Authenticode™ technology brings a new level of security to the Internet. Authenticode helps guarantee that you know who published software you get from the Internet, and that it hasn't been tampered with en route to your computer.

One-click, customized installation

The Internet Explorer Administration Kit (IEAK) enables corporations and Internet Service Providers to quickly create and distribute a Web browser that reflects their specific needs and the needs of their users.

NetMeeting: Internet Telephony and Collaboration

Use Microsoft Netmeeting to collaborate on a document, scribble on a whiteboard, or share any Windows application with one or more other users on the Internet.

Improved Features

Multimedia Support

ActiveMovie technology is the best way to view multimedia content on the web, including new formats like MPEG audio and video. Notice how Progressive Download gets any media clip playing sooner.

Customization

Only Microsoft Internet Explorer gives you fine control over your browser's interface, so you can totally customize your Internet experience.

Easy Upgrade

Trying Internet Explorer 3.0 is painless. Your Netscape bookmarks are converted automatically. Internet Explorer 3.0 is compatible with your Netscape plug-ins, and Internet Explorer is free!

Free and Exclusive Content!

Special arrangements with the leading content providers on the web, Internet Explorer 3.0 lets you view exclusive content and get free access to top content sites like ESPNet SportsZone, InvestorsEdge, and The Wall Street Journal.
