Subject: Microsoft seems to be laughing, Please read

HI

I am a Microsoft supporter,, well at least in the past,, Microsoft seemed to be inovative & supplying good products & support.. I have been reading articvlae lately from other professionals or people like myself who alarmed at the changing practices of Microsoft.. Where is this going to leave us if Microsoft rears its ugly head in a rabid attitude.. We all use the Windows platform & would be at its mercy,, I hear of things that begin to turn my stomach in the idea that such an idea might happen to soon.. The have to much power & control which in the hands of some is way to frightning.. Microsoft should also pay for the costs of such a trial as well,,

I will keep it short as to not overwhelm,, I still like Microsoft, at least for the moment but my opinion is changing along with many others in the Tech world.
Microsoft needs a good spanking not a scoulding

Thanks

Your supporter

Ken
