Subject: Settlement Feedback

To whom it may concern,

Having been in the computer support industry for the last 13 years, I can say for certain how disappointed I am in this possible settlement structure.

Microsoft should not be allowed to exploit their co-mingling of application & OS products. Doing so **hurts** innovation, and fosters additional monopoly abuses. These abuses have been ****PROVEN**** true. Any move by the justice system that doesn't prevent this from happening again is a slap to the face of consumers...

Sincerely,

-Steve Clark
