Subject: Settlement!

My opinion of Microsoft is that they want total control of my computer and everything I do! I cannot use Netscape as my browser as Microsoft has made enough hoops to jump through to make it a continuing frustrating experience! Hindsight is of course better, but a few years back Bill Gates promised more freedoms...now they are all gone when dealing with the Explorer, it only hooks you onto Gates gadgets!!!!
What kind of settlement would I want? To be able to use my computer without Microsoft always leaning over my shoulder! Thanks Linda Armstrong

ps-I think Microsoft should have to fund all schools that fall below and behind. And while Gates is at it, pay the salaries of the special computer teachers that will be needed. This is a HUGE need!!!!
