I think what you have done over these many years to Microsoft has been great for the lawyers but a disgrace for you. Would Japan do this to Sony or Germany to Siemens??. Microsoft is a national treasure for Americans to be proud of and appreciative for all it has contributed to making the U.S. #1 in the world in technology.

Because Larry Ellison came crying to you because he couldn't stand the competition you caused millions of taxpayers dollars to be wasted aside from diverting Mr. Gates time from innovating and causing him unnecessary stress. Don't you understand how rare such a creative brilliant person is? That our government should try to destroy him and his work is really evil. Unfortunately you are powerful enough to destroy anyone and any thing wasting the taxpayers money. I am so ashamed of the Dept of Justice. Did I say Justice ?? Where is the Justice? Are you going to reimburse the tax payers or Mr. Gates? No, your buddy lawyers have it all in their fat pockets and we are all poorer for your activities. You were not protecting us.

You would have better spent these years getting Universities to inform you when students from terrorist countries disappeared. You could have sent illegal foreigners out of our country. Illegal means nothing to you when it is a foreigner breaking our laws but you attack one of the greatest Americans to come along. How is it that a Mexican can illegally cross our border and have a baby and it is a legal citizen? You have lost your mind and care not for the law. How do these illegal foreigners get so privileged?

Lets hope you will spend our tax money protecting us from real danger---terrorist not a great national asset such as Microsoft
