Subject: My opinion about the Microsoft anti-trust case

To DOJ,

I was disappointed by the settlement. I feel that Microsoft continues its anti-competitive practices and must be prevented from doing so.

I honestly feel that breaking up the company was going to help bring more competition.

Also, I believe it is the only thing Microsoft fears.

I would not feel so harshly about the company if they had more stable products.

Without competition, how do we get better software? They set the bar way too low.

Herb
