Subject: Antitrust?

You know,

If the USDOJ. is unsure of exactly what their job is, or is supposed to be, I'll remind you on this one case. The court system to include the supreme court had found that Microsoft was a monopolist. It took years, and probably millions of dollars to figure this out. Everyone knew it but they were allowed to drag this on for that long. This is the second time they have been accused of this crime.

I as a citizen of this country would like to know what the USDOJ is going to do about it, what is the punishment going to be, and what steps are going to be put in place so this does not happen again.

I am not an Open Source Zealot, a Democrat or any thing else. What I am however, is a citizen of this country who has spent most of my life defending it, and for that I paid a heavy price. What I see is something going on that is not legal and needs to be investigated. It gives me a bad taste in my mouth and a sick feeling in my stomach that my government can so flagrantly violate and disregard its own laws. What on earth is this country coming to.

Sincerely,
Brad Clark
