I cannot understand why this case is still going on because of a few states who apparently are not tending their own affairs and are cheating their constituents while they are squandering their time and their state's money while they are away from the real work they should be doing and wallowing in their 5 minutes of fame.

Microsoft has done more for more people throughout the world than any other company in history. Thanks to Bill Gates and Microsoft, and the wise decision I made years ago to buy their stock, I am assured of a decent retirement. I am sick and tired of seeing success being punished in our country and as soon as someone has it the leeches come out of the woodwork to bleed them dry with idiotic lawsuits, etc. PLEASE, let's get over it and let Microsoft progress and continue to do so much good for so many.
