Subject: Microsoft Settlement

Hello I am a member of the community that supports BeOS. I feel that Microsoft's tactics limited BeOS from competing in the market despite a product that was very competitive. As a remedy I suggest that Microsoft immediately allow dual or triple boot options for computers from the large computer manufacturers like Dell and Compaq without any penalties. There should also be much more documentation on the win32 API so if a developer wishes to create a compatible yet superior product they may. Finally Microsoft should pay I think between 50 and 100 million dollars to either Be Inc or Palm for the damages their tactics cost to the companies.
