Subject: Proposed settlement is fair

Dear Justice Department,

I believe that the proposed settlement between the US and Microsoft is fair and should be implemented. Further, I think the nine States should stop their independent efforts to seek further remedies, and join with the US to settle.

It is interesting that most of the opposition to settlement comes from Microsoft's competitors and their employees. Our laws were designed to make sure consumers are treated fairly, not to permit companies to gang up on a company they don't like.

Yours sincerely,
Jeremy Butler
