Subject: Microsoft Settlement

Dear Justice Department:

The proposed settlement with Microsoft makes it seem as if it is a company that is only cocerned about innovation and fair minded capitalism.

Nothing could be further from the truth.

Microsoft is a government backed monopoly used to provide a uniform computing platformto simplify subjugation of the citizens. Breaking up Microsoft is the logical solution. I do not expect it because government prosecution of Microsoft is a sham to pay lip service to those who rightly fear fascism.

If there are those in the U.S. Justice Department who admire Teddy Roosevelt (_The Trust Buster_), then perhaps a break-up of Microsoft can be hoped for. Please attempt it.

Sincerely,

William Moore
