Sirs: Microsoft software has been a boon to me since I started late on PCs and now am 84. To have software on my PC that is all coordinated(with no language problems) makes it easy for my wife & I to pursue our genealogy and family history projects. The "others" only cover small areas and are complicated, both in installing, but in maintaining.

If you want to go after monopolies take on people like AOL, QWEST and the various cable companies.

Just leave our good software alone!

Thank you,

Wilbur T & Dorothy H Johnston wtj@olympus.net
