**Subject:** Microsoft Case Settlement

Dear Justices,

As a citizen of the United States I would like to express my opinion on the settlement issue of the Microsoft case. I feel the offer Microsoft has given is fair and in the best interest of the public. I urge all states to accept this settlement and end the case as soon as possible.

Any further suites or punishment of Microsoft is not in the best interest of the general public and will only harm and impair Microsoft's future ability to continue delivering cutting edge software at reasonable prices. Many if not most of the nation rely on Microsoft's quality software every day for our livelihood. If you try to cripple or punish Microsoft further than has already been proposed will be detrimental to the public who rely on their software.

Any further larger fines will simply make the software more expensive for the end users and all of the general public will be harmed.

Please come to a reasonable settlement as quickly as possible.

Thank you.
