To Whom It May Concern:

Enough already. The liberals have attacked the economy on several fronts, and the result is the bad economy we have now and the weak economy we have had for 6 or more years. Continue with the Microsoft witch hunt and not only is this an action that does not represent the public's interest at large, but the NASDAQ and the technology industry as a whole will continue to suffer! We all can see what the results of that are, but it could get much worse.

Microsoft as a company is not an angel, and they are not totally innocent. But the settlement is more than fair. More would be, in my opinion, mean and vindictive. And ultimately very damaging to everyone except those that might benefit from a shift in political power, or who might get some gratification for tearing down someone else's achievement which they envy.

End this travesty of justice now and help the American People get back to work.

Thanks.
