Subject: Microsoft Settlement

I believe that the court should accept the settlement. Public money should not be used in bringing such cases against corporations that have helped USA become the world 's leading economy that it is today. If companies feel intimidated by government interference such as this, America will not remain the prime location that it is today to establish global businesses.

The current recession and events threaten to set us back. We need to do everything we can to not let this happen. The Government needs to focus on issues like Security, Foreign Policy and Economic Stimulus. There is no point in dragging this case any further. Please accept the settlement.

Thanks
