Subject: Microsoft Settlement

Dear Ms. Hesse I believe the agreement reached between the Department of Justice and Microsoft was in the best interest of us consumers. The judicial system should not be interfering in the software business. The market is more than capable to decide what it wants. I believe the whole trial was due to the complaining and whining of Microsoft's competitors. They should concentrate more on their business and let the Justice Department concentrate on more important matters. Thank you for a job well done
