Subject: Microsoft Settlement

I would like to add my voice to those raised against the proposed Microsoft settlement. If the proposed settlement is granted to Microsoft, it will be a crushing blow to the computer industry.

Microsoft has been found guilty of breaking the law. They must not only be stopped from continuing to break the law (something the proposed settlement attempts but does not ensure), they must be subject to just punishment.

I agree with Ralph Nader's open letter (found here: <http://www.cptech.org/at/ms/rnj12kollarkotellynov501.html>) 100%. It is my desire that a new penalty be composed based on Mr. Nader's observations.

Thank you,
- Jared Burns
