Subject: Microsoft Settlement

Dear Sirs --

I'm writing as the CEO of a Silicon Valley based software consultancy.

I am writing to state that I believe that the proposed settlement between the U.S. and Microsoft is flawed and will serve very little in fostering competition and punishing Microsoft. It will in effect, let Microsoft get away with less than a "slap on the wrist".

I hope you'll take this opportunity promote capitalism, fairness in commerce, and the growth of technology by pursuing justice and not letting Microsoft walk away triumphantly after having been found guilty by the U.S. courts.

Sincerely,
Aurangzeb Agha
