Subject: Microsoft Settlement

Ladies and Gentlemen:

I think in view of the findings of the court the proposed settlement agreement is totally insufficient. It has found that MS has repeatedly misused its monopoly in order to hinder competition. The victim is the user who has to pay higher prices and suffer products that are filled with flaws because as a monopoly there is no compelling reason for MS to make really reliable products.

I think it would be more than shameful to let MS get away with its conduct with such a lame settlement agreement.
