Subject: Greetings !

Greetings !

I don't agree with this ruling in Microsoft vs. DOJ. Our great country is built on justice and liberty for all, not by rewarding the guilty and punishing the good. Microsoft is the guilty party, and if the punishment is not strong enough, it will continue on with it's current behavior, as it has done so many times in the past. Please do not make the same mistake. I believe one cannot buy justice in these great United States of America.

Thanks.
