Subject: Microsoft Settlement

Dear Sirs,

As an American living overseas and concerned about the monopolistic practices of Microsoft in my country, I have to say that the proposed settlement is not only a very bad idea, it is a farce. Microsoft has been proven extremely guilty and should receive a very stiff sentence instead of the feeble wrist slap that is currently on the table. It is sad that after winning the case so handily, the DOJ has backed down instead of demanding the kind justice that would truly benefit the American consumer.

Joaquin Cruz.
