Once again I wish to express how I feel about the importance of settling the Microsoft case.

I am disappointed that AOL Time Warner has filed a suit against Microsoft. Maybe it is time for the government to look at AOL. Isn't it time that the government not be deterred by companies that I feel are taking advantage and jumping on the proverbial bandwagon for their own self interest?

I might add that it is unfair, unjust and self-serving. Please settle this case and stop the obvious motives to prolong the settlement.
