---

Attention Mr. Webmaster. Could you please ask Ms. Varney what she was smoking when she said that this merger would be beneficial and innovative to the public as I would like to order some of it. I'm not sure how someone in her position isn't aware of the definition of a monopoly and it's damage to the people our government is meant to represent. Does she really believe the already exorbitant service charges will go down now that there is no competition? Once again we the people get the shaft from the government and the rich corporations with deep pockets will continue to get richer. Thanks for nothing Ms. Varney (Other than increased service charges)
